October 6th, 2021, Wednesday

Vote of thanks

I would like to say thanks to everyone who helped me throughout the internship journey. My parents, friends and Clevered mentors especially Ms. Smita, Your passion for teaching and your dedication to your students is obvious in everything you do.

I would also like to thank Mr. Ken Khan for making coding easier for us and for many children like us around the world.

Introduction

My name is Syeda Ritaj. I am 13 years old and I am in 8th grade. I have just completed AI wizards level 1. I am a beginner artist and animator.

The Internship journey:

It was fun and interesting. It is a great learning opportunity.

This internship inspired my creativity and made me more curious about AI.

I learned a lot of new information in this course and I am eager to learn more and more.

I love the interaction in the classes and how we all share our knowledge with each other.

I am overjoyed that I earned the rockstar badge in some of the mentorship sessions.

My Project:

This game is about a boy named 'Chocoo' who is obsessed with chocolates. The player's goal is to help Chocoo become healthier by eating fruits and exercising regularly. The player can control the character using hand gestures.

○ **My project:**

I chose to make an 'adventure game that works using poses and hand gestures'.

Why did I choose it?

I wanted to make a game which would be interesting and beneficial at the same time. This game will help small children learn about health and the importance of healthy food.

**Quick demo of
my project:**
